

Appendix A: Downtown Maps

High Coverage Alternative Downtown

The map at right shows weekday service downtown in the High Coverage Alternative. (It is an inset of the larger map shown on page 10.)

To explore this network and its relevance to your life, or the lives of people you care about:

- 1. Find a place you care about on the map, using the labeled streets.
- 2. Note which routes are nearby, by number and by color.
- 3. Look at the legend below to see what frequency those routes would have on weekdays.
- 4. Look at where else those routes go, outside of downtown. (You may need to refer to the map on page 10.)
- 5. Refer to the table on page 16 to learn how the frequencies of these routes would change throughout a weekday, how many days of the week they operate, and what hours of service they offer.

Because this Alternative is designed to cover all of the neighborhoods where service exists today, it is not possible to increase frequencies on any routes. It is also not possible to increase spans of service (e.g. at night or on weekends) by more than a little bit on a few routes.

High Coverage Alternative

WEEKDAYS

SACRAMENTO, CA

Frequency (minutes between buses) at midday on a weekday

15 minutes
